EXOTIC OLDS INTAKES

by Joe Padavano

There are six pictures, two each of the factory experimental cross ram, the factory experimental weber manifold, and an aftermarket mechanical fuel injection manifold built by Algon. The cross ram and weber intakes appear in a picture of Olds experimental engines in the July 1969 issue of Hot Rod. The cross ram appears on a green 455 in the back row of the HR pic, while the weber intake actually serves as the basis for the fuel injection setup used on the aluminum block 455 shown on the cover of that mag. I managed to buy each of the three at swap meets in So Cal during the 80s. The cross ram, as you can see, is configured for dual Q-jets positioned back-to-back. Between the two carb locations you can see a black bellcrank for the throttle linkage. The threaded holes in the top surface of the manifold are for access to tighten the bolts holding the intake to the heads.

****NOTE LOCATION & TIME CHANGE****

The next meeting of the Oldsmobile Club of Arizona will be held on Saturday, February 23rd at 1:00 p.m. during the All Oldsmobile Show in the Rock 'N Roll McDonald's parking lot in the Scottsdale Pavilions Shopping Center, Loop 101 & Indian Bend Rd.

IS YOUR NATIONAL MEMBERSHIP CURRENT?

As you should know, all Oldsmobile Club of Arizona members are required to be members of the Oldsmobile Club of America (OCA), the national club. Once a year we have to submit a list of our members to them, to ensure that we are compliant with their rule. We will be submitting that list very soon. If your OCA membership is not current, please renew it right away. You can tell if your membership is current if you are receiving the monthly magazine Journey With Olds (JWO). If you are not receiving this magazine, then your membership has expired. Your membership expiration date is shown on the mailing label of the JWO. If we have non-compliant members we will be in jeopardy of losing our OCA charter. Please don't let that happen. Renew 2 months in advance to ensure your membership does not lapse.

IT'S TIME TO RENEW YOUR ARIZONA DUES

It's time to renew your membership dues. If you are married or have a Significant Other, your dues are \$24.00 for 1 year, and \$48.00 for 2 years. If you are single your dues are \$21.00 for 1 year, and \$42.00 for 2 years. 2008 HURST OLDS NATIONALS IN FLAGSTAFF, AZ JUNE 26-29, 2008

The Hurst Olds Club of America & Karl Sup are looking forward to hosting the 2008 H/OCA Nationals in Flagstaff, Arizona, June 26-29, 2008. For those of you not familiar with Arizona, Flagstaff sits in northern Arizona along Interstate 40 at a cool elevation of 7,000 feet and is situated on a pine and prairie covered volcanic plateau at the base of the highest mountains in Arizona, that reach up to 12,957 feet. Snow can even linger on these mountain peaks through July!

The host hotel for this event will be Little America Hotel, 2515 East Butler Avenue in Flagstaff. We currently have a block of discounted rooms available at \$129 per night, king or queen(2). To book your reservation, call them toll-free at 800-865-1401. For more information about the facilities, please visit their website at <http://www.littleamerica.com/flagstaff/>. The hotel is located on 500 acres of ponderosa pine forest and offers awe-inspiring sightseeing and recreational opportunities to the Grand Canyon, Sedona, and various national monuments. The hotel features 247 luxurious guest rooms, designed with floor to ceiling windows, imported marble and spacious baths & dressing areas, each with 31" televisions, down pillows, and other luxury amenities. The grounds are beautifully landscaped with flower gardens.

We're looking forward to hosting a great show and expect a large turn out of cars. We have some great events planned which include a cruise to Williams, AZ on Route 66 and ride on a steam locomotive to the Grand Canyon. Stay tuned for more updates as the dates approach! If you'd like further information, or would like to volunteer (even remotely) to help out on the planning committee, please email Karl at kjsup@cox.net or call his cell phone at 602.628.8866. See you in Flagstaff '08.

These holes are plugged with pipe plugs once the bolts are torqued. Other bolts are accessed through the carb holes. This is similar to the Chrysler Max Wedge intakes. You'll note that both factory intakes carry the firing order in raised numbers, as well as an identification number that starts with "ER" (experimental research?). The Algon FI manifold also has velocity stacks and injector plumbing (not shown in the pics). There are two throttle shafts which run longitudinally through the ports and eight individual butterflies. A linkage across the rear of the manifold works these two shafts in sync.
